BSNL Speed Test

Bharat Sanchar Nigam Limited, also called BSNL, is a state-owned and one of the top ISPs in India, providing quality internet services to millions of customers. It provides FTTH, phone, internet, GPON, and TV services.

We provide BSNL broadband subscribers with the best speed test services.

Our speed test tool is best when you experience frequent drops and lags while using the internet. It takes only a second to measure the internet speed, enabling you to identify the cause of your slow connection.

Our speed test tool provides you with an accurate measurement of your internet's download speed, upload speed, ping response rate, and jitter level.

When you run our speed test tool, it provides you with a fast internet connection. Plus, if your ping response rate is over 100 ms and the jitter level is higher than 30 ms, then it means that your internet speed is not up to the standard.

Considering these metrics, our BSNL speed test tool helps you to check your internet speed. You just need to access our tool and run it. Just a few seconds, and it will let you know whether your internet speed is slower or faster.

Use our BSNL Internet Speed Test Tool to diagnose any weaker internet connection for free. No expert help is required to perform the upload speed test, download speed test, ping speed test, or jitter speed test — since our tool is intuitive enough to easily deliver desired results.

How to Check Internet Speed?

Follow this 3-step method to check your internet speed using our BSNL Speed Test Tool for free:

STEP 1 - Specify Your ISP

First, select your "internet service provider" from the drop-down menu. If unsure who your ISP is, simply click "Select automatically". Our tool will identify your ISP and run the internet speed test accordingly. Bharat Sanchar Nigam Limited (BSNL) is the most famous in India.
